**COMMENTS OF THE  
CELLULAR TELECOMMUNICATIONS & INTERNET ASSOCIATION**

The Cellular Telecommunications & Internet Association ("CTIA"),<sup>1/</sup> pursuant to the Public Notice released September 4, 2001,<sup>2/</sup> hereby submits its comments in support of the wireless E911 Phase II waiver request filed by Cingular Wireless LLC and its subsidiaries ("Cingular").<sup>3/</sup> Cingular has requested a limited waiver of the Commission's Phase II E911 rules to permit it to deploy a network-based technology throughout its Time Division Multiple Access ("TDMA") and/or Advanced Mobile Phone Service ("AMPS") network.<sup>4/</sup>

Cingular's request satisfies the Commission's criteria for waivers of the Phase II E-911 rules. Consistent with the Commission's stated position that its E911 rules should not "hamper

<sup>1/</sup> CTIA is the international organization of the wireless communications industry for both wireless carriers and manufacturers. Membership in the association covers all Commercial Mobile Radio Service ("CMRS") providers and manufacturers, including cellular, broadband PCS, ESMR, as well as providers and manufacturers of wireless data services and products.

<sup>2/</sup> Public Notice, "WTB Seeks Comment on Wireless E911 Phase II Waiver Request Filed by Cingular Wireless LLC," CC Docket No. 94-102 (rel. Sept. 4, 2001).

<sup>3/</sup> Cingular Wireless LLC Petition for Limited Waiver of Section 20.18(f), filed Aug. 31, 2001 ("Cingular Waiver Request").

<sup>4/</sup> CTIA also supported a Phase II waiver request filed by Cingular on July 6, 2001 that would permit it to deploy a hybrid solution throughout its planned Global System for Mobile Communications ("GSM") network, which includes a handset-based Enhanced Observed Time Difference of Arrival ("E-OTD") solution.

the development and deployment of the best and most efficient ALI technologies and systems,”<sup>5/</sup> the Commission should grant Cingular’s waiver request.

## **DISCUSSION**

The wireless industry is committed to providing the best possible Phase II E911 service to subscribers, but carriers can only do as much as the currently available wireless location technology permits them to do. The Commission itself has recognized that during the transition to full Phase II deployment, there may be situations in which it is not possible for a carrier to satisfy the Commission’s Phase II standards by the prescribed deadlines. It therefore established a process under which individual waivers could be granted. In addition to satisfying the Commission’s traditional standards for a waiver by showing that “special circumstances warrant a deviation from the general rules, and such a deviation will serve the public interest,”<sup>6/</sup> carriers must demonstrate that “technology-related issues” or “exceptional circumstances” make it impossible for them to deploy Phase II by October 1, 2001.<sup>7/</sup> Moreover, the relief sought by the carrier must be “specific, focused and limited in scope, ...with a clear path to full compliance” with the Commission’s Phase II rules.<sup>8/</sup>

Cingular’s request to deploy TruePosition’s network-based technology clearly satisfies the standards established by the Commission for waivers of the Phase II E-911 rules. As

Cingular explains, it has been unable to identify another solution capable of providing a path to full compliance. Cingular has pursued multiple Phase II E-911 technologies as potential solutions in order to determine how to bring the best possible Phase II service to its customers under these circumstances and “has chosen to deploy the only type of technology capable of satisfying the Commission’s rules on TDMA networks.”<sup>9/</sup> Cingular determined that the TruePosition solution will supply location information for TDMA subscribers, analog subscribers, and roamers and “will satisfy the FCC’s accuracy requirements.”<sup>10/</sup> The relief Cingular requests in order to implement its chosen technology is “specific and limited,” with a “clear path to full compliance” after a reasonable transition period. Because Cingular has satisfied the requirements for a waiver of the Phase II E911 implementation rules, the Commission should grant Cingular the relief it seeks.

Granting Cingular a waiver of the Phase II rules is also consistent with the Commission’s policy of technological neutrality for E-911. As the Commission has explained, “there is no single perfect ALI solution. Each has its advantages and limitations. Each may be improved in the future. Under these circumstances, we believe that the public interest and public safety will best be served by allowing a broad range of technologies, including handset-based opportunities, a reasonable opportunity to compete in providing 911 ALI.”<sup>11/</sup> Granting limited waivers of the Phase II rules to individual wireless carriers is simply a further extension of this policy, which recognizes that every wireless carrier will face unique circumstances as it transitions from Phase I to Phase II and no single Phase II solution will work in each of these situations.

## **CONCLUSION**

For the reasons set forth above, the Commission should grant Cingular's Phase II E911 waiver request.

Respectfully Submitted,
